Cable Prep Work

Brian Boal asked me to stay in the office today.

I spent the day doing office work, including:

- I filled out hauling & installation checklists for recent work at the Tower saddle. I completed all of the checklists on the work that I inspected. Also, I went through all of them to itemize the Tower saddle checklists that are missing or incomplete. There are 5 Tower saddle checklists that are not complete: #12, #70, #71, #72, & #137. Strand #12 needs to be completed by Matt Bruce. I asked him to complete it. Strand #s 70, 71, 72, & 137 need to be done by Roman Granados. I left a note along with the binder in his cubicle for him to complete these checklists.
- I attended the weekly RE update meeting from 08:00 until 08:30.
- I searched PMIV & read recent Cable submittals & RFIs.
- I downloaded ABF Submittal 2505R02 (Cable Band Installation), & started to review it.
- Prepared for Cable compaction field work (discussed details of the inspection with other Cable group staff members, & make some practice measurements on the Cable mock-up).
- Other misc work (organized my desk, checked email, etc).
